### **DETAILED ACTION**

Claims 10-27 are currently pending in the instant application.

#### **I. *Priority***

The instant application is a 371 of PCT/EP04/06654, filed on June 19, 2004 and claims benefit of Foreign Application GERMANY 103 33 588.9, filed on July 24, 2003.

#### **II. *Information Disclosure Statement***

The information disclosure statement (IDS) submitted on November 20, 2007 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

#### **III. *Restriction/Election***

##### ***A. Election: Applicant's Response***

Applicants' election without traverse of Group wherein the process is drawn to hydrogenating a C6-C18 aromatic substituted amino acid or C6-C18 aromatic substituted amino alcohol having an asymmetrical carbon atom in the reply filed on June 16, 2008 is acknowledged.

Subject matter not encompassed by the above elected group are withdrawn from further consideration pursuant to 37 CFR 1.142 (b), as being drawn to nonelected inventions.

#### **IV. Rejections**

##### ***Claim Rejections - 35 USC § 112, 1<sup>st</sup> paragraph***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The "C6-C18 aromatic substituted amino acid or C6-C18 aromatic substituted amino alcohol" are not defined in the specification so as to know the structures of the compounds that are included and/or excluded by the term. There are a wide variety of compounds that are embraced by these genus groups. There are at least 20 amino acids that could be embraced by Applicants' elected group and then substituting the numerous amino acids or amino alcohols with a variety of aromatic compounds leads to a vastness in subject matter that is not clearly defined and disclosed in Applicants' specification. Therefore, the specification lacks adequate support for Claims 10-27.

##### ***Claim Rejections - 35 USC § 112, 2<sup>nd</sup> paragraph***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10-27 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such

omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. Applicants' claim recites "A process for the hydrogenation of a C6-C18 aromatic substituted amino acid or C6-C18 aromatic substituted amino alcohol having an asymmetrical carbon atom." The Specification states:

"In particular, the invention concerns the hydrogenation of aromatic compounds

such as formula I

in the presence of a platinum-rhodium mixed catalyst".

The omitted structural cooperative relationships is the structure of formula (I). It is unclear what the metes and bounds of the structural groups that are embraced by the claims.

## V. **Objections**

### Claim Objection-Non Elected Subject Matter

Claims 10-27 are objected to as containing non-elected subject matter. To overcome this objection, Applicant should submit an amendment deleting the non-elected subject matter.
